Response to Amendment

Specification

1. The amendment filed July 10, 2002 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows:

“a first control section which has positional information on a position of the opening of the mask and which causes the extruding section to be driven by controlling the first drive section based on the positional information”; and

“a second control section which has the positional information on the position of the opening of the mask and which causes the squeegee to be driven by controlling the second drive section based on the positional information”.

Applicant is required to cancel the new matter in the reply to this Office Action.

Applicant's response was silent to the support in the specification for the two phrases.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-14 and 21-26 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time

Art Unit: 1722

the application was filed, had possession of the claimed invention. The specification does not provide support for the first and second control sections having positional information as mentioned above in paragraph 1. The specification provides support for first and second drives sections, but is silent as to the first and second control sections and the positional information used to control the first and second drive sections.

Allowable Subject Matter

4. Claims 1-14 and 21-26 contain subject matter, which is not taught or suggested by the prior art of record; however, removal of the new matter from the claims will cause the rejection based on Kawakami et al to be reinstated.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
